

# Filosofiska Nepal

## Monthly Progress report of February 2016

In the month of February we were really busy with our study. This month students had a new experience of playing soccer on the top of the six stories shopping complex, Sky Futsal. Kids loved it and soccer Nepal supported us for everything. We conducted third parents meeting for this session. All the parents participated and provided us with useful suggestions. Teachers shared their experiences in class and updated about students. Six new children joined the Filosofiska Nepal family. They all are earth quake victim from different places of Nepal. They all live in the hostel. Their names are as follows:

1. Santosh Regmi
2. Santosh Magar
3. Pemba Galje Sherpa
4. Anjali Rai
5. Pemba Rai
6. Paras Rai

This month we celebrated birthdays of:

1. Deepak Thapa magar
2. Raj Tamang
3. Rohit bi. Ka

This month we played a new game: Ice and water, which children enjoyed a lot. They understood the concept and played with fun.

For the first week, we participated in a science exhibition. They observed the exhibition with great enthusiasm. The same week we had a free dental camp as well, organized by Kantipur Dental Hospital.

On the second week of February we taught them about love between friends and teachers. On special day of valentine we hug each other and spread messages about love.

On the third week, students had a new experience of playing football on rooftop of a shopping complex.

On last week, we had different extra activities to make all the students busy. As exam is coming soon so we gave more focus on learning by doing. We worshiped the goddess of education as “Saraswati Puja” on 13<sup>th</sup> February. At this occasion we worshiped the goddess of education and we distributed sweets to the children. Goddess Saraswati is the goddess of learning, wisdom, knowledge, fine arts, refinement, science and technology. It is believed that on this special day we will attain enlightenment through knowledge and to rid themselves of lethargy, sluggishness and ignorance.

This year we gave them concept about leap year as well, since this year is a leap year. Nearly every four year is leap year which has 366 days, as opposed to common years. Children were excited to know about leap year. They were asking about next leap year which is February 29, 2020.

We extended our classroom activities like wise:

1. Science activities
2. Math activities
3. English activities
4. Craft activities
5. Reading activities
6. Social Studies activities
7. Critical activities
8. Art activities

Especially for pre schoolers we introduced worksheet in:

- |         |            |            |           |
|---------|------------|------------|-----------|
| 1. Math | 2. Science | 3. English | 4. Nepali |
|---------|------------|------------|-----------|
